

The LCS3 patch panel has been designed and produced to optimize space, with up to 48 ports per unit and to make maintenance and future upgrades easier. It features a quick eject system for loading and unloading a cassette from the front of the rack, and an innovative cable guiding system for tidy and easy cable management. Accepts HDJ (UTP), HDJS (FTP), HDFM, and HDJ AV connectors.

NOTE: All panels and cassettes are sold unloaded, HDJ connectors sold separately

Features & Benefits

Fast Push-Button Ejection: Cassettes pop out with a single push of a finger

Front Loading Access: Cassettes eject from the front of the rack for quick access to remove jacks and access cables.

Cable Management: Keep cables organized with the cable fingers

Label Fields: To easily indicate category and media type
