

Clarity® SNAP™ patch panels offer improved rear cable management with the addition of an adjustable depth rear management bar. The rear portion of these bars is also removable to provide more working room for the initial termination of panels. After cables are SNAP terminated, the rear bars are attached and adjusted to the depth that best matches the cable and rack selections. SNAP panels are also supplied with SNAP-on positioning bend limiters. These plastic cable management aids assist with maintaining proper bend radius of all cables while minimizing the stress on any one cable. This is especially beneficial for cable bundles, as this allows the dissipation of any stress across the entire bundle instead of any one cable termination.

Features & Benefits

Totally modular cabling system Dramatically faster deployment of horizontal cabling and port replication

Supplied rear cable management: Supports good cabling practices.

Specifications

General Info

Product Line	Ortronics	UPC Number	662875677604
Country Of Origin	Mexico	Application Sector	Commercial/Industrial
Type	Panel		

Dimensions

Product Width US	19.0 in	Product Depth US	6.5 in
Product Height US	1.75 in		

Additional Information

RoHS Conformant	Yes
