Manual Controller

Features & Benefits

Wide trim flange is designed to meet the ADA Accessibility Guidelines as it pertains to ADA Standard 4.5 which addresses changes in floor and ground surface levels. The poke-thru trim flanges are beveled so the slope is no greater than 1:2 ratio.

Quick and easy installation without the need for additional fasteners or a second installer.

Evolution Series Poke-Thru Devices are available in multiple finishes, (BK) black, (GY) gray, (NK) nickel, (BS) brass, (BZ) bronze, (AA) brushed aluminum, (SB) satin brass, and (SN) satin nickel to seamlessly match your environment.

Satin brass, satin nickel and brushed aluminum finishes offer a more durable, high-end look with a tougher clear powder coat.

A surface style cover is for mounting on top of the finished floor surface. The surface cover is designed to be used for carpet, tile, wood, polished concrete, or terrazzo.

Accepts industry standard power, communications and A/V devices from most manufacturers including Legrand AVIP, Extron® and more.

Designed to fit A/V devices, including wall plate style transmitters, like the Crestron DM/TX series, without any additional parts.

Evolution Series Poke-Thru Devices use an intumescent material that maintains the fire rating of any floor for up to 2 hours.

Unique cover design

UL Fire rated for up to 2-hour rated floors maintains the fire classification of the floor

UL Listed and UL fire classified to U.S. and Canadian safety standards

Meets ADA accessibility guidelines

Open system for expanded compatibility

Ideal for high foot traffic environments

Multiple finishes

Multiple preassembled options: Available in Unwired and Prewired options to save you time on the jobsite

Installation: The cover opens a full 180 degrees with two unique spring-loaded slide egress doors to keep wires, connections and people safe.
