

Legrand keyed LC fiber solutions provide a simple and convenient way to physically prevent the user from making an unauthorized connection by blocking access to specific optical ports, whether they are at a workstation outlet or in a telecommunications room or data center. This is particularly important for government, finance, military and other facilities where multiple networks having different security level access requirements may be co-located.

Features & Benefits

| 12 color/key configurations available | 50/125 microns and 9/125 microns laser-optimized fiber types available |
|---|---|
| LC Keyed cadapters prevent improper connection of separate networks with common access points | Each LC secure adapter will mate only with same-color LC secure connector |
| High quality 1.25 mm zirconia ferrules used | Internal keying feature prevents tampering |
| High quality 1.25 mm zirconia ferrules used | 1.6 in boot protects the splice for easy cable management |
| The solution to managing multiple networks with reduced risks | |
