

Wattstopper
Discontinued - PIR Ceiling Occupancy Sensor, 500 sq ft, 24VDC
Part No. CI-205-1

Wattstopper's CI-200 Series Passive Infrared (PIR) Ceiling Sensors provide 360° coverage to detect occupancy in the controlled area. These low-profile sensors reliably control lighting in a variety of applications.

Features & Benefits

360° coverage

User-adjustable time delay and sensitivity

Low-profile design

Built-in light level sensor

Isolated relay for use with HVAC or other control systems

ASIC enhances reliability and helps eliminate false triggers

Automatic or manual-on operation when used with a BZ-150 Power Pack

Specifications

General Info

Product Line	Wattstopper	Replaced by Part Number	CI-305-1
UPC Number	754182913312	Country Of Origin	China

Technical Information

Sensor Type	Occupancy
