Wattstopper
**Remote Test Switch on Single Gang Plate**
Part No. EMTS-100

Wattstopper's ELCU-200 Emergency Lighting Control Unit is a self-contained device that allows any standard lighting control device to control emergency lighting in conjunction with normal lighting in any area within a building.

## Features & Benefits

- Eliminates energy waste caused by emergency lighting that is always on
- Connects to EMTS-100 Remote Test Switch or other input to activate emergency on from a remote location
- Senses local single circuit power failure
- Compatible with Wattstopper occupancy sensors, daylighting controls, lighting control panels, and dimmers
- Integral push-to-test button activates emergency mode for a true test condition
- Operates as a control device or as a shunt
- Zero cross switching technology for reliability and increased product life

## Specifications
