

Wattstopper
Discontinued - DLM AX3.8 JACE 8000, Max 125 Rooms
Part No. LMJA-8125-AX

The LMJA-8xxx-AX (using AX 3.8) is a network controller designed to communicate with wired and wireless DLM network Bridges, for local in-room wired networks and/or LMCP panels. It provides control, monitoring, adjustment, and standard or Human Centric Lighting (HCL) scheduling functionality for networked DLM systems. The Network Supervisor is a PC server running similar software designed to coordinate control of multiple LMJA-8xxx's and store historical data.

Features & Benefits

- Includes Wattstopper 1st year software maintenance agreement.
- Allows remote changes to occupancy sensor and daylighting sensor settings in real time
- Adjusts scheduling of normal and after hours
- Create standard and HCL lighting schedules. Schedules may be repeating seven day, calendar event based or astronomic control
- Allows real time current monitoring of rooms and groups when using load controllers with current monitoring circuitry (e.g. LMRC-2xx or LMPL-201)
