

LMSW-100 Series Digital Wall Switches are low voltage devices for energy-saving manual on/ off control of one or more loads from one or more locations. They are part of a Digital Lighting Management (DLM) system and can control any load(s) connected to DLM room controllers.

## Features & Benefits

8-Button Wall Switch	LMSW-100 Series Digital Wall Switches are low voltage devices for energy-saving manual on/ off control of one or more loads from one or more locations. They are part of a Digital Lighting Management (DLM) system and can control any load(s) connected to DLM room controllers.
Low voltage pushbutton switches for control of multiple loads	Each button can control individual or multiple loads, or one scene
Plug to other components using Cat 5e cable and RJ45 connectors eliminating wiring errors	Customizable buttons with LED status indicators
IR transceiver for wireless configuration and remote control	Plug n' Go automatic configuration and Push n' Learn for personalization

## Specifications

### General Info

Color	Red
UPC Number	754182945900
Countries Of Origin	China
Product Line	Wattstopper
Application Sector	Commercial
Type	Combination
Standard	UL

### Additional Information

RoHS Conformant	Yes
Product Has Potential to Contribute to LEED	No
