

Wattstopper
HID fixture reflector sensor mounting bracket
Part No. MB-2

The MB-2 is a J-Plate HID mounting bracket used to install occupancy sensors in a variety of settings. The bracket includes an adjustable plate that allows sensor rotation to achieve the desired angle for optimal coverage. The bracket also includes a built-in bubble level that afford the installer reliable guides to ensure the bracket is correctly positioned before adjusting the sensor. The MB-2 is constructed of aluminum with a clear powder coating finish. With the MB-2, sensors can be attached directly to High Intensity Discharge (HID) fixtures, mounting to the bottom rim of the HID reflector bell and secured to the rim with three clamping screws. Sensors recommended for use with the MB-2 bracket include the CX, CI and HB sensors. The MB-2 includes a J-shaped bracket and a sensor mounting plate. The MB-2 also comes with extension wires that can be used, if needed, to connect the attached sensor to the DM HID controller.

Features & Benefits

Brushed aluminum construction	Mounting plates adjustable to preset angles
HID fixture bracket (MB-2)	Multiple mounting options with MB-1
Compatible with most Wattstopper occupancy sensors	Built-in bubble level for accurate installation

Specifications

General Info

Product Line	Wattstopper	UPC Number	754182912766
Country Of Origin	China	Application Sector	Commercial

Dimensions

Product Width US	5.0 in	Product Weight US	0.3 lb
Product Volume US	52.25 cu in	Product Depth US	4.75 in
Product Height US	2.0 in		

Technical Information

Compatibility	Wattstopper Occupancy Sensors
